

# *Learning Wisdom for living*

This presentation is the revealing of a taonga/treasure that is gifted to humanity and presented in detail.

A paradigm shift of great proportions is being made in these times; from a system that has been based in profit, compliance and control, we're moving toward one that is about nurturing and realising human potential, freedom and peace.

Topics:

- **The Pillars:** The foundations and plinths on which the new system is built.
- **A New Language:** using different words to create a paradigm shift.
- **The Framework:** a framework to build wisdom based on connection, communication and creativity.
- **Learning Environments:** a description of the environments we create with the shift in paradigm.
- **The Council:** the administrative and advisory structures in place of beaurocracy.
- **Soul Wisdom University:** A completely new approach to how each unique soul gains the wisdom through soulful intention, playful exploration, and self-evaluation.

PDF copies of the slide deck and/or the frameworks are available on request.
